Subject: HAWC - New Veg fire in North Valley Division

[REDACTED]

1856 hrs - [REDACTED] @ HAWC called to report a new vegetation fire in North Valley Division. The fire is 2 acres in size and burning at a slow rate of spread in mountainous terrain. The responding fire agency will be the US Forest Service and due to the terrain, fire personnel may have to hike in to the fire location. PSS's assigned to event are [REDACTED] and [REDACTED] (working remotely). Per [REDACTED], the latitude/longitude location is 39.874739-121.378288. Our nearest distribution asset is the Bucks Creek 1101 circuit and the fire is located south of switch # 17183. There are no active outages in OMT. A T-Men is enroute to this location.

Based upon the location, Transmission does have 3 T-Line assets in the area: **ROCK CREEK-POE-230kV Conductor**, **BUCKS CREEK-ROCK CREEK-CRESTA-230 kV Conductor**, and **CARIBOU-PALERMO-115kV Conductor**.
